FIRE•TEST BANKS

Three Ways to Purchase Software!

(User purchases one of three licenses and desired test banks)

Single User/Single Computer - License of software to a single user/computer in one location/building. The primary end user is usually a single fire department location. Program disks may not be copied or used on any other computer or by anyone other than the single user at the site. Used for manual entry and hand scoring. **\$995**

Single User/Single Computer w/Mark Reader Option - License of software to a single user/computer in one location/building. The primary end user is usually a single fire department training location, certification entity or fire academy. Program disks may not be copied or used on any other computer or by anyone other than the single user at the site. Manual input for student recordkeeping capability or use a mark reader for automated scoring and test recordkeeping. **\$1,895**

Single User/Server Fee w/Mark Reader and Online Testing Options - License is intended for use by one primary user who generates tests on multiple computers through a file server at one location. Secondary users (instructors, etc. - not students) require additional user licensing. Call for information. Software may not be copied for off-site use or used in a network or file server off the licensed site. **\$4,195**
